

Wyeth Selected as one of the U.S. Environmental Protection Agency's Best Workplaces for Commuters for Third Consecutive Year

MADISON, N.J., Oct. 25 /PRNewswire/ -- Wyeth (NYSE: [WYE](#)) announced today that it has been named to the U.S. Environmental Protection Agency's (EPA) list of "Best Workplaces for Commuters" from the Fortune 500 Companies for the third consecutive year. Wyeth jumped six spots to the 13th position on the 2006 ranking. Wyeth also topped the list among pharmaceutical companies. The EPA recognizes the top 20 Fortune 500 Companies that provide outstanding commuter benefits, such as subsidized transit/van pool passes, shuttles to their employees, ride matching and preferred parking for carpools.

"For the third consecutive year, Wyeth is being recognized for its commitment to being socially responsible and environmentally conscious by supporting employee commuter programs that will continue to reduce road congestion and vehicle emissions," says Steven Tasher, Vice President, Environmental Affairs and Facilities Operations and Associate General Counsel, Wyeth.

The EPA has recognized Wyeth facilities in Collegeville and Great Valley, Pa.; Madison, N.J.; Pearl River, N.Y.; Sanford, N.C.; and Andover and Cambridge, Mass.; as locations that provide the highest level of commuting options for employees.

Wyeth's use of commuter benefits has been growing steadily. The Company's carpool program increased dramatically during 2006 and added, on average, 10 new carpools per month.

The Wyeth Commuter Assistance Center (CAC) was established in June 2001 at the Wyeth Pharmaceuticals headquarters site in Collegeville and Great Valley, Pa., and currently coordinates transportation and commuter programs made available to more than 13,000 employees at seven sites. A socially responsible and environmentally conscious program, the CAC has continued to reduce road congestion and vehicle emissions by providing Wyeth employees with alternative ways of commuting to work.

Wyeth is one of the world's largest research-driven pharmaceutical and health care products companies. It is a leader in the discovery, development, manufacturing and marketing of pharmaceuticals, vaccines, biotechnology products and non-prescription medicines that improve the quality of life for people worldwide. The Company's major divisions include Wyeth Pharmaceuticals, Wyeth Consumer Healthcare and Fort Dodge Animal Health.
